Clemson University

McAdams Hall

821 McMillan Road, Clemson, SC 29634

BRIGGS & STRATTON LED HANDS-ON SMALL ENGINES TRAINING

This 3-day school will guide you through all of the facets of Briggs and Stratton Engines being used in the OPE industry. You will completely disassemble, inspect and reassemble A Briggs & Stratton engine model 130G32 overhead valve engine. After completing this course you will have the technological edge to be successful in today's OEP industry. This class includes many components that are used to train our dealer network.

Subjects to be covered will include: Introductions & company profile, Decoding engine numbers, parts, assemblies, basic engine concepts & parts identification, 4 cycle, carburetor theory & teardown, governor system theory, compression & ignition systems, lubrication systems theory, curriculum overview and discussion of materials provided. Each component includes hands on engine teardown and assembly as well as test running of the engine plus much, much more!
