

South Region Rally

GPS Course

-This activity is intended to mimic the GPS portion of the FFA Environmental Natural Resources Career Development Event

GPS Locations (100 points) (30 minutes)

1. Students/chapters are encouraged to bring a Global Positioning System (GPS) unit.

-Any 12 channel GPS unit can be used.

-The coordinate system used to designate points will be latitude and longitude in degrees/minutes/seconds.

-Map datum used to collect points will be NAD83.

2. Using GPS unit, the participant will be required to walk to and locate the points.

3. Students will then record a predetermined identification mark (FFA Quiz type Question) located at each point along with the answer(A, B, C, D) that corresponds to a FFA Quiz type Question from FFA general knowledge at each point.

4. After the students return to the checkout station, time will stop and then they will answer the FFA Quiz type Question on the GPS score sheet. *If they answer the question on the score sheet before checking back in the participant will not receive any credit.*

5. It is advised that students know how to read longitude and latitude numbers and how to use a GPS unit.

6. After 30 minutes, students will have 2 points deducted for each minute up to 45 minutes. Time will be called at 45 minutes.
