

Clinical Practicum #1: Administering an Intramuscular Injection

You have been asked to administer 2.0 mL of Dextrose Solution intramuscularly to a dog. Use the “orange” as the model for the dog. Please explain each step as you demonstrate the proper procedure for administering an intramuscular injection.

Clinical Practicum #2: Surgical Preparation

Dr. Keldie is going to perform a growth removal on Uga, the bulldog. She asks you to prepare the surgical site. Please explain each step as you demonstrate the proper procedure.

Handling/Restraining Practicum #1: Applying a Gauze Dog Muzzle

Lizzie became aggressive during an exam so Dr. Jeffcoat asked you to use a strip of gauze to muzzle her. Please explain each step as you demonstrate the proper procedure for applying a gauze dog muzzle.

**Please untie the gauze muzzle before you exit.*

Handling/Restraining Practicum #2: Tying a Square Knot

You are assisting Dr. Velez on the ranch while vaccinating horses. As you go through the gate into a corral she asks you to close the gate and tie it with a square knot. Please explain each step as you demonstrate the proper procedure for tying a square knot.

**Please untie the rope as you exit the gate.*
